

January 2019 e-permitting Release Notes

Storage Tanks

- **5141** – Mass verification page – expand the client to facility level by default.
- **5147** – Mass contact update – If invoice address is no longer needed, remove the association for that address from the facility in EFACTS.
- **5145** – From the Customer pending tab, user may click on invoice number to get the detail on the invoice such as credits or other adjustments, which may alter the total amount due.
- **5143** – The notification email sent to the application upon payment should include a list of the facilities that were paid.
- **7363** – Remove the Request Type from the Pending and Completed Dashboard grids.
- **1339** – Customer Dashboard grid should sort the Facility ID numerically.

Asbestos

- **6853** – Add the Municipality column to the Internal Reviewer Dashboard.
- **14056** – Add an Application Information block to the Internal Application Overview.
- **6854, 6855, 6858, 6890** – Advanced Search
 - Add Notification ID and Revision; Municipality and County to Search Results and Excel export.
 - Add Search by Region.
- **6850** – Add an instruction text block to the top of the Authorization Overview page for the customer.
- **6844, 6878** – Submission report – Add DEP submission date and the assigned notification ID. Add a signature line and the submitter information.
- **6842** – Remove start date restrictions from application.
- **6870** – Remove date restriction from Date of Emergency field.
- **6875** – Remove date restriction from Abatement start dates and Demolition dates.
- **6593** – Rename the Asbestos Notification Module to the General Information Module.

Mining

- **14481** – Add an Application Information block to the Internal Application Overview.
- **14157, 14158** – NOIE Internal and Customer User Guide updated.
- **13943** – Advanced Search on Internal Review side.

Radiation Protection

- **13762** – Date last paid details populated in the PF/SF fields in EFACTS.
- **7363** – Remove the Request Type from the Pending and Completed Dashboard grids.

General features

- **12707, 12708** – On the review side, the ability to recall a correction notice and the view correction notice history.

eReview Correction Notices - LERNER G WELL SITE & TANK FARM OG ESCGP - 115-21895

BWEW - Chapter 105

- **12711** – In each module for the customer’s specific General Permit, there is a grid of Impacts. Currently, the applicant may associate one or more structures with the impact and those structures will show back on the General Permit module in a column. The column (highlighted below) will be displayed in the grid.

Impact Type	Name or ID	Related Structure(s)/Activity(ies)	Status	Edit	Delete
Stream Indirect Impact	Stream Indirect Impact 1	Activity 1, Crossing 1			

[Add Impacts](#)

- **13986, 12713, 13979** – The Chapter 105 Minor Revision.
- **12719** – On the review side, quick search by APS Number.

- **12730** – On the review side, view details of the NHD point that was snapped.

NHD

Use the NHD Locator tool to either accept the default snapped point or create a user-defined, new and/or add. Reference the NHD Locator Tool User Guide for the steps. You will need to choose a "Stream Side" (Right or Left). Choose the side of the stream the well SHL is on if you are looking in the direction of downstream flow snapped points, as necessary. Once you are done creating the snapped points:

Click Save
 Click Close
 Click Save NHD Points

Verify the information is accurate. Use both the CH93 Description and CH93 Existing Use Code to determine if the feature is in the correct protection watershed. Ensure the designation is consistent with the application.

- **13671 (Reported Bug)** – On the review side, the geologic task was generating a validation message that line items need answered.
- **12731** – On the review side, the ability to bulk apply correction notices to other submissions from the same submitter.

The screenshot shows a web application interface with a navigation bar at the top containing 'Home', 'Maintenance', and 'Logout'. Below the navigation bar, there is a 'Due Date' field with a calendar icon and an 'Include Elevated Language' checkbox. The main content area is divided into two sections:

- Correction List:** A table with two columns: 'Module(s) to Unlock' and 'Correction Detail'. It contains two rows:

Module(s) to Unlock	Correction Detail
Application Form	1. On xyz correct 123.
Fugitive Emissions	1. Correct emission data abc.

 Below the table is a link: 'Add New Correction Item'.
- Correction Notice History:** A table with five columns: 'Action', 'Date Action Taken', 'Sent Correction Due Date', 'PDG Strike Included', and 'Elevated Language'. It contains four rows:

Action	Date Action Taken	Sent Correction Due Date	PDG Strike Included	Elevated Language
Created	3/6/2018			
Sent to Operator	3/8/2018	3/28/2018	No	No
Revoked	4/6/2018			
Sent to Operator	4/9/2018	4/29/2018	Yes	Yes

 Below the table are buttons: 'Save', 'Delete Correction Notice', 'Back', and 'Apply to other Submissions' (highlighted in yellow).

- **12732** – On the review side, the ability to bulk apply conditions, and variances to other submissions from the same submitter.

The screenshot shows a web application interface with a navigation bar at the top containing 'Home', 'Maintenance', and 'Logout'. Below the navigation bar, there is a 'Due Date' field with a calendar icon and an 'Include Elevated Language' checkbox. The main content area is divided into three sections:

- Conditions List:** A table with two columns: 'Condition Detail' and a red 'X' icon. It contains two rows:

Condition Detail	
1 In a letter dated March 16, 2015, the Department approved the following request from the permittee to exceed the standard pit dimensions found in 25 Pa. Code Chapter 87.141: - The total number of open pits at any time shall not exceed three. - The maximum distance between the highwall and the outside toe-of-spoil shall not exceed 500 feet.	X
2 a. Open pit #1 shall not exceed 101,064 cubic yards in volume. Open pit #2 shall not exceed 69,854 cubic yards in volume. Open pit #3 shall not exceed 7,000 cubic yards in volume. *Note: Pit size may exceed 100' x 400' during project start up in phases 1B and 1C, but the combined volume of all three pits shall not exceed 177,918 cubic yards. b. The maximum disturbed area requiring spreading of topsoil shall not exceed 50 acres at any time. A minimum of 0 percent of the topsoil must be located no further than 500 feet measured horizontally from the disturbed areas requiring topsoil spreading at all times.	X

 Below the table is a link: 'Add New Condition'.
- Variance List:** A table with two columns: 'Variance Detail' and a red 'X' icon. It contains one row:

Variance Detail	
1 SMP No. 32130108 authorizes a variance, approved July 2, 2013 by the Blacklick Township Supervisors, to the 100 foot barrier requirements of Section 4.2© of the Surface Mining Conservation and Reclamation Act to conduct the following surface mining activities within 100 feet of the right-of-way of public road T-464: To conduct mining and support related activities within 100 feet of and temporarily remove, mine through, and close a portion of T-464 (Stuchell Road), beginning 600 feet south of T-429 (Graham Road) and extending an additional 2,115 feet south along both sides of the T-464.	X

 Below the table is a link: 'Add New Variance'.
- Cover Letter:** A section with a 'Cover Letter Language' field and an 'Insert Canned Statement' link.
- View Permit:** A section with two links: 'View Current Draft Permit' and 'View Cover Letter Draft'.

At the bottom of the interface are buttons: 'Save', 'Back', and 'Apply Conditions/Variations to other Submissions' (highlighted in yellow).

- **9755** – On the review side, a data comparison report to see differences between an original submission and an alteration.
